**DOTIK SURVEY**  
We are running a survey on explainers in science centres and museums: if you have not done so yet, please fill in the DOTIK questionnaire!

**Dotik Training School**  
**August 28 - September 2**  
**2006 Trieste, Italy**

Dotik is a project aimed at developing and testing methodologies for training explainers (animators, demonstrators, pilots, mediators, guides,...) to effectively promote a science/society dialogue, and to act as strategic, two-way interfaces between science museums and their public.

Dotik is a 24-month project funded by the European Union under the Science and Society section of the Sixth Framework Programme for Research and Technological Development

Dotik is the slovenian word for "contact".

Ad hoc participatory events are held by science museums and other institutions to stimulate the involvement of citizens in scientific debates and decisions. We believe that it is also crucial to create a more widespread fabric of participation, disseminating the culture of science/society dialogue in all informal learning contexts and activities of popularization of science.

SCIENCE AND SOCIETY

Action plan

In December 2001 the European Commission agreed a Science and Society Action Plan. The document sets out a new strategy to make science more accessible to European citizens, and 38 actions to achieve this objective.

[Foreword by Philippe Busquin](#)

[Background](#)

[Science and society: towards a new partnership](#)

> *Promoting scientific education and culture in Europe*

- Public awareness
- Science education and careers
- Dialogue with citizens

> *A science policy closer to the citizens*

- Involving civil society
- Producing gender equality in science
- Research and foresight for society

**Learning@ Bristol**

A one-stop destination for a great day out with endless educational opportunities. Students will be interested and inspired, seeing new ways of looking at the world...

Workshops | School visits

Linking the exhibitions, Open Spaces are full of discovery and surprise. A complex of new public squares - full of shops, cafes and places to relax. You can enjoy the stimulation of public art in the form of beautiful water and light features, sculptures and landscapes then watch as these become the exciting backdrop for live performances and multi-media activities for both day and night viewing.

# Co se dělo ve škole?

## 1. přednášky, referáty

What role for adults in children's exhibition ?

An educational partnership

Adults are considered as partners, educators, and visitor assistants, with whom we share a common goal: helping children learn

# Co se dělo ve škole?

2. workshopy, diskuse,  
„hry“ – návštěvník x průvodce,  
aktivity v roli návštěvníka

úkolem byla krátká  
scénka, která  
ilustruje  
diskutované téma,  
např.  
nanotechnologie,  
jaderná energie  
(návštěvníci)
